6 QUICK TIPS ON USING PINERGY'S SEARCH

We realize you use a variety of devices when researching

properties for your customers. That's why we redesigned the Pinergy Search page to work exactly the same on your laptop as it does on your tablet or phone! It may look a little different, but look twice - every feature from the old page is still there, separated into boxes that stack differently depending on which device you're using. We've made the Search function responsive, so you can be more responsive to your clients!

1 Status

You can now select multiple statuses with standard clicks or taps of your phone - no need to get the Control key involved.

what you've typed.

What you see is what you've chosen! Additional criteria displays in easy-tounderstand boxes, and you can add unlimited criteria by selecting "Select."
